Introducing AusDI Advanced
Australian Comprehensive Independent Drug Information Reference

AusDI is a comprehensive, independent, unbiased source of drug and therapeutic information developed for Australian pharmacists, medical practitioners, nurses and other health care professionals.

Editorial process:
All content in AusDI Advanced drug monographs is developed according to strict editorial guidelines by qualified editorial pharmacists. It complies with a rigorous quality assurance and review process under the guidance of the Editorial Advisory Committee.

Benefits:
- Australian Drug Information
- Easy to navigate and fully searchable
- Independent Drug Monographs
- Recommended pharmacy board reference in NSW, Victoria and Tasmania

NEW ADVANCED FEATURES:
- Medicines Product Information (PIs)
- Consumer Medicines Information (CMIs)
- Drug Images
- Independent Drug Monographs
AusDI Advanced is a comprehensive, authoritative, unbiased source of drug and therapeutic information developed for pharmacists, medical practitioners, nurses, students and other health care professionals.

Designed to give you convenient web-based access to multiple sources of reliable drug product information, AusDI Advanced includes full text, evidence-based drug, drug-class and complementary drug product monographs developed independently of pharmaceutical company influence, product information (PI), and consumer medicine information (CMI) leaflets and drug product images with fully searchable attributes.
